

A Very Fast Christmas Card

Supplies

- Christmas Classics Photopolymer Stamp Set
- Brightest Glow Stamp Set*
- Very Vanilla Note Cards & Envelopes
- Traditions of St. Nick Designer Series Paper
- Very Vanilla card stock, scrap size
- Real Red Stampin Ink pad
- Real Red & Garden Green Ribbon
- Glue Dots
- Multi Purpose Liquid Glue

Directions

- Stamp your inside greeting first before folding the card; it is a little easier to do it this way. The inside greeting I used is from the Brightest Glow Stamp Set; of course an inside greeting is completely optional*.
- Stamp your outside greeting onto a square of vanilla card stock cut to 5.5cm x 5.5cm (2-1/8 x 2-1/8). If you have the matching dies set to the Christmas Classics Stamp Set, you can die cut the squares using the square die.
- Cut your patterned papers to 8.5 cm x 12cm (3-1/4" x 4-3/4"). Glue to the front of your card.
- I used Stampin Dimensionals to raise up the greeting, which is centered on the card. If you are making a lot of cards and need to keep the costs down, glue the greeting directly onto the patterned paper layer.

- Tie a bow with matching ribbon and use a glue dot to affix to the greeting.
- I made three each of the cards shown below, except for the red on the end, I made six of that one. I had fun mixing them up a bit. (My husband likes to give Christmas cards to his team.)

I have listed the ink colors and ribbons I used in the photo right, they all match the Traditions of St. Nick Designer Series Paper:

- Real Red Stampin Pad
- Garden Green Stampin Pad
- Real Red & Garden Green 3/8" ribbon
- Pebble Path Stampin Pad
- Pebble Path 3/8" Textured Ribbon
- Copper Clay Stampin Pad
- Copper Clay 3/8" Textured Ribbon
- Old Olive Stampin Pad
- Wild Wheat 3/8" Textured Ribbon
- Cherry Cobbler Stampin Pad
